ABSTRACT
Polycystic Ovarian Syndrome (PCOS) is multi-factorial and polygenic condition. It interferes with metabolic, endocrine and reproductive functions. It affects the pituitary - ovarian hormones and results in infertility, menstrual problems and excessive body hair growth in female. According to Ayurveda this type of clinical features found in Pushpaghni Jataharini and Nashtartva. Treatment of PCOS according to Ayurveda is mainly to correct hyperinsulinemia by using Pramehghna drugs, weight reduction through and diet, drugs, Vyayama, Pranayama. Give Yakritotejaka drugs for the oestrogen clearance and to decrease its bio- availability and clear the Avarana by using Vatakapha nashaka drugs for the proper follicular genesis and ovulation.

Keywords: Polycystic Ovarian Syndrome, Pathadi churna, Arogyvardhini Rasa.

INTRODUCTION
Polycystic ovarian Syndrome (PCOS), an emerging lifestyle disorder involving multiple systems affecting 5- 10% of the women exhibiting the full blown syndrome of hyperandrogenism, chronic anovulation, and Polycystic ovaries.[1] PCOS is a psychosomatic disorder of uncertain aetiology characterized by Obesity, Anovulation associated with Primary of Secondary infertility, hirsutism, abnormal menstrual pattern, increased incidence of pregnancy loss, and pregnancy related complications. Polycystic ovarian syndrome is a most prevalent endocrinopathy. Incidence of this disease is increasing nowadays because of sedentary lifestyles, pollution, and excessive intake of junk food. PCOS is affecting 4 to 6 percent of unselected women of reproductive age.[2] Modern medical science has no alignment to cure PCOS, they only able to provide symptomatic treatment for it, which has unsatisfactory results lots of side effects and costly also and when medication not gives although symptomatic relief then they go for surgery like drilling of ovaries. In Ayurveda, there is no direct reference about PCOS but when we go through the literature there are many references which are nearer to sign and symptom on PCOS. Clinical features of PCOS are nearer to Pushpaghni Jataharini.[3] According to the reproductive point of view, the pathogenesis of PCOS is similar to condition of Nashtartva.[4] Vitiation of vatakapha (↑ estrogenic state) leads to Avarana of artava (inhibition of FSH) leads to Nashtartva (no proper growth of follicles and chronic anovulation)

CASE REPORT
A 27 years old woman came to the OPD of IPGT & RA (Prasuti Tantra and Stri Roga OPD) on 20/03/19
OPD no. 23831 GAU Jamnagar Gujarat. The chief complaint of Failure to conceive since 3 years
She also complaint of irregular & delayed with scanty menstruation (1-2 days, only spotting) since 3 years.
Associated complaint of weight gain and hair growth on face and chest for 1 year.
Menstrual history:
L.M.P.-19/03/19,
Past L.M.P-26/1/19
Duration of flow-1-2 days
Interval- 50-60 day
Marital history -3.5 year
O/H- GoPrLaA
Coital history (C/H) -3-4 Time /week
Contraceptive history (CO/H) - Nil
History of previous treatment - nil

On-Examination
General condition of patient was found good. Her family history was found normal. A detailed comprehensive history reveals that in the beginning the weight was gradually increasing. As usual, the patient avoids consulting a medical professional because of which pathology get worse. The patient belongs to high socio-economic class having junk food (Viral dhahara) and sedentary habits, which helps to aggravate the disease. The rest of her physical examination was unremarkable.

Vitals Examination
Blood pressure - 120/70mm of hg,
Pulse rate - 86/minute
Weight- 76kg and Height -163.5 cm, BMI-26 Kg/m²

Personal history
Appetite-Poor
Sleep- normal
Bowel-constipation
Bladder-clear

Blood Investigation (On 22-03-2019):-Hb-11.3 gm%,
TLC -5300 /mm³, ESR-22mm/hr, Neutrophill-43%,
Lymphocytes-53%, Eosinophil -2%, Monocytes- 2%,
Basophils -0%. HIV, HBsAg, VDRL were negative.
LFT, RFT & Lipid Profile was normal. MT – Negative,
T3- 1.22ng/dl, T4 –12mcg/dl, TSH- 5.23 mcIU/ml, FSH- 4.65mIU/ml, LH- 12.75mIU/m (LH: FSH is >2:1).

Ultra-Sonography for Uterus & Adnexa
A pelvic ultrasound was performed which revealed a normal appearing uterus with endometrial thickness of 11.9 mm. No. of follicles in Rt. ovary were 13-15 and in Lt. Ovary were 10-12. Rt. Ovary volume was 21.4 cc and Lt. Ovarian volume was 14.4cc and both ovary are bulky and echogenic.

Urine Test for Routine and Microscopy- Within normal limits.

Treatment Protocol
[1.] In 1st stages (1 to 7 days): - Patient was treated with Deepana - Pachana and koshthsodhana
A. Guduchi churna 2gms + Haritaki churna 2gms +
   Shunthi Churna 1gms total 5gms bds before meals
   with Luke warm water orally for 7 days.
B. Erandabhristha Haritaki – 5 gms at night (one
day before starting the treatment) after meals with
   Luke warm water orally.

[2] In 2nd stages (Day 8 to 3 months):- Patient was treated with Pathadi Churna 5gms and Arogyavardhi-
   ni Rasa 500mg bds after meals with Luke warm water orally.

### DISCUSSION

Guduchi, Haritaki, Shunthi: - Deepana - Pachana property and help to rejuvenation also act as Rasayana or ojas. Erandabhristha Haritaki: Helps in cleansing and detoxifying body system. It helps to clear obstruction and normalize strotas. Pathadi Churna: Help to remove blockage in the channels and also works on polycystic ovary due to kaphanasak and granthi hara property. Arogyavardhini Rasa: Helped to stimulate function of liver and thus enhancing kayagni and dhatwagni. This give stimulus to all secreting glands leading to normal secretions i.e. increase secretion of SHBG by liver which leads to decrease in androgen production. Triphala: helps in cleansing and detoxifying body systems. It helps to clear obstruction and normalize the strotas. Triphala also very useful for reducing body fat. It also contain Tamra (copper), which has scrapping (Lekhana and Vranashodhana action) ultimately reducing body fat and also good result of acne due to Vranashodhaka property. It also contains chitrakamoola treating a multitude of disease like menstrual problem, liver problem and infertility. Guggul holds high significance in the management of complication of PCOS like Obesity, Cardio vascular disease and Hypertention. The chemical ingredients of drugs possess hypolipidemic, hypoglycemic, folliculogenesis, antioxidant, hepato protective etc. Pranayama and meditation calm the mind which leads decrease level of depression, anxiety and stress.

### CONCLUSION

PCOS is an increasing public health problem which is very common and leading cause of infertility in women. Polycystic ovarian syndrome or PCOS is a condition in which a women’s level of sex hormone like oestrogens and progesterone are imbalanced. Allopathic medicines are limited, comparatively Ayurveda have various options of medicine without any side effects for every symptom of PCOS. Allopath helps in managing and controlling effects of PCOS while Ayurveda can be considered as best cure and promising treatment with no side effect.
