ABSTRACT

Ulcerative colitis is the inflammatory disease which is causing ulcers in the colon and rectum. The prevalence rate of ulcerative colitis is 2-3% in the world which is characterized by Vomiting, Diarrhoea, Rectal bleeding, Abdominal pain and Weight loss. The symptom of Ulcerative colitis can be congruent with symptom of Pravahika in Ayurveda, such as Atipravahana purisha, Udarsoola, Raktayukta purisha. In Ayurveda, various treatment modalities have been illustrated for Ulcerative colitis as Diet, Medicine and Panchakarma. In this present study, the specific some drugs had been selected along with Matra basti with Yasthimadhu taila for treating the ulcerative colitis which shown gradually very effective and successful result while combined with Allopathy medication.

Keywords: Ulcerative colitis, Pravahika, Shamana ousadhi, Matra basti, Panchakarma.

INTRODUCTION

Ulcerative colitis is inflammatory bowel disease which causes the inflammation and ulcers in the rectum and colon. Ulcerative colitis occurs between 15 to 30 years of age. The main symptom of the disease is like Diarrhoea, along with blood and mucous, associated with weight loss and pain.¹-⁴ The main Symptom of the ulcerative colitis can be congruent with the symptom of Pravahika in Ayurveda, like Atidrava purisha pravritti (watery stools), Atipravahana purisha (repeated defecation), udarshoola (pain abdomen) and raktayukta purisha (blood mixed stool).⁵-⁸

In modern science, usually ulcerative colitis is treating by administering the anti-inflammatory steroids such as Prednisolone followed by antidiarrheal (lomotil), antibiotics (sulphasalazine) and Multi-vitamins⁴ but the prognosis of this disease is very sluggish whereas in this present case study, the prognosis of Pravahika is showing very effective, fast and successful consistent result by administering such Ayurvedic medications followed by Matra basti as Panchakarma treatment along with Allopathic medication.⁹,¹⁰

AIM AND OBJECTIVES:

The aims and objectives of this study were as follows –

1) To provide the efficacy of Ayurvedic treatment modalities to manage the ulcerative colitis.
2) To provide a safer treatment by reducing the need of steroids.
3) To provide an alternative treatment of surgical processes.

MATERIALS AND METHODS

➢ Selection of the patients
Age-23 yrs
Sex- Male
Religion – Hindu
Marital Status-Single
Economic Status- Middle

➢ Study centre
Alva’s Health Centre (Multi speciality Hospital)
Moodbidri, Karnataka, India
O.P No. of Patient-28729

➢ Plan of study
▪ Proforma compiled with detailed clinical history and physical examination of the patients.
▪ Routine clinical investigations, before performing study.
▪ After confirming the diagnosis, patient was advised to follow treatment guideline strictly.

➢ Assessment criteria
▪ The improvement in the patient was assessed on the basis of relief in signs and symptoms of disease.
▪ Clinical examination was performed to detect the reduction of lesion as improvement criteria.

➢ Clinical examination of registered patients

➢ Present complain:
  ✓ Rakta yukta purisha or bleeding per rectum
  ✓ Atidrava purisha or Loose stools
  ✓ Picchila,Saphena purisha or Sticky and frothy stools
  ✓ Udarashoola or Pain abdomen
  ✓ Loss of appetite
  ✓ Loss of weight

➢ History of present illness:

The patient was apparently well one and half years before but since one and half year he was being suffering from bleeding per rectum, associated with frequently loose stools with mixing bleeding, pain abdomen and loss of appetite. So, for betterment he approached to Alva’s health centre (Multi speciality hospital) first on 16th Nov, 2016.

➢ General examination
P.R- 78 b/pm
B.P- 100/70 mm of Hg
Temp- 98.6°F
Clubbing- 2nd grade
C.V.S- N.A.D
R.S- N.A.D
Body Wt- 39 kg

➢ Systemic examination
Inspection: No abnormality detected in abdomen
Palpation: Tenderness
Percussion: Tympanic
Auscultation: Bowel sounds

➢ Investigation
Sigmoidoscopy- on 17/11/2016, showing multiple polyps and ulcers throughout the recto sigmoid region with mucous.

➢ Figure 1: Sigmoidoscopy report -multiple polyps and ulcers throughout the recto sigmoid region with mucous.

Follow up
The patient was follow up since one and half year

Last follow up on 08/05/2018-
Body wt – 42.74 kg
Appetite – Normal
Bleeding per rectum- stopped
Loose motion- 1-2 times/day
Pain in abdomen – Occasionally
Sigmoidoscopy- on 08/05/2018, showing apparently normal report

Figure 2: Sigmoidoscopy report – Normal report after treatment

RESULTS
- Effects of Ayurvedic oral medication showing significant result after treating with this treatment protocol.
- Matra basti with Yasthimadhu taila offered significant relief in ulcer.

DISCUSSION
Effect of Matraabasti
Ulcerative colitis is a disease of purisha vaha srotas which is caused by Pitta pradhana Vata doshas. Matra basti helping to reduce the symptoms of Ulcerative colitis or Pravahika where it is afflicted by dosha as kapha, vata and agnimandya.

- Matra basti having specific property which is beneficial for management of ulcerative colitis, such as –
  - Sheetal
  - Pittahara
  - Madhura
  - Sangrahi
  - Sandhana
  - Vrana ropana
  - Pitta shamaka

So, Matra basti helps to reduce the symptoms of Ulcerative colitis or Pravahika where it is afflicted by dosha as kapha, vata and agnimandya. So, Matra basti reduces inflammation, burning sensation, pain and cramps.

- Yasthimadhu taila has properties of Pitta Vata shamana and also vrana shodana and ropana which help in healing ulcers in the colon by basti karma. It also has stambhana properties that help in reducing the bowel frequency and check bleeding.

Effect of Shamana Ousadhi
Kutaja parpati, Bilwadi gutika, Chirabilwadi kashayam, these shama ausadhi are having in general property which are beneficial for management of ulcerative colitis, such as-

- Stambhana property which stopping Raktayukta purisha.
- Sangrahi property which decreasing the frequency of bowel movements.
- **Pitta shamak** property which reduces passing *Raktayukta purisha*.
- **Vatanulomana** property which relieved *Udara shooola* and *Pravahana*.
- **Amapachana** property which corrects *Pravahana* and *Drave purisha pravritti*.
  - Specific effect of *Kutaja parpati* – Antidysenteric, Antidiarrheal, Haemostatic, Anti-amoebic action.
  - Specific effect of *Bilwadi gutika*—Antidysenteric, anti bacterial, reduces abdominal discomfort, improves digestion and appetite.
  - Specific effect of *Chirabilwadi kashayam*—reduces constipation, indigestion, flatulence, anorexia.

**CONCLUSION**

*Ayurvedic* treatment of ulcerative colitis and other chronic inflammatory bowel diseases is effective in reducing disease symptoms and disease relapses and can reduce the need of conventional standard drugs. Moreover, the treatment is safe, inexpensive, easy to handle and well tolerated by the patients. This present study suggests that *Matra basti* with *Yasthimadhu taila* followed by oral medication as *Kutaja parpati, Bilwadi gutika, Chirabilwadi kashayam* having significant result to treat Ulcerative colitis.
